

Efficient and Healthy Schools Campaign Recognition Program

Apply Now for the 2022/2023 Program

The Efficient and Healthy Schools Campaign will recognize solutions and efforts by K-12 schools and districts in the categories below. Title I, rural, and schools in disadvantaged communities are especially encouraged to apply. Recognition will be awarded for demonstrating planning or implementation in either category below. Schools and districts can gain national recognition and share their success stories. Supporters can assist schools and districts they work with to submit an application.

Recognition Categories

Energy Efficiency Plus Health:

Recognize schools and districts that have implemented retrofits, performed building assessments or planning in preparation for retrofits, with the goal of providing an energy-efficient and healthy learning environment.

Emissions Reduction and Resilience:

Recognize schools and districts that have implemented strategies, or identified pathways and planned activities, with the goal of reducing emissions and improving resilience.

Two Ways to Gain Recognition

[1] Planning Track

Participating schools and districts will complete a 3-part webinar series (Jan-Mar 2023) to learn about assessment tools and get assistance in planning activities. Schools must complete a final plan describing how topics covered in the webinars inform decisions to improve their school facilities.

- **Energy Efficiency Plus Health:** Jan 10, Feb 14, and Mar 14
- **Emissions Reduction and Resilience:** Jan 24, Feb 21, and Mar 28

[2] Implementation Track

Start by downloading the application form to describe building improvement projects (must be from 2018 or more recent years) related to one or both categories. Submission materials, including supporting data and documentation showing facilities improvements and outcomes, are due Mar 1, 2023.
